Suchitra Sekhar

SOFTWARE • WEB & APP DEVELOPMENT • AI / DATA ANALYTICS

Email: suchitrasekhar2004@gmail.com | Phone: +91 7386306101
Portfolio: suchichinnu.github.io | GitHub: github.com/Suchichinnu | Hyderabad, Telangana

PROFESSIONAL SUMMARY

Data Science and Artificial Intelligence undergraduate with hands-on experience in web and app development, API integration, Microsoft Power Platform, and database-supported workflows. Built internal applications and approval processes at ICRISAT. Co-inventor on a child-safety borewell rescue robot invention disclosure. Skilled in Python-based data analytics and AI full-stack development, including LLM/GenAI applications, RAG pipelines and AI agents, with a focus on software development, backend/API work, and AI-enabled applications.

TECHNICAL SKILLS

Programming	Python, JavaScript, Java, HTML5, CSS3
Web / App Development	Responsive web interfaces, application development, UI layouts and wireframes, debugging and testing
APIs & Automation	API integration, Microsoft Power Apps, Power Automate, Power BI, SharePoint, workflow automation
Data & Analytics	SQL/MySQL, MongoDB, database management, Excel, Python analytics with Pandas, NumPy, Matplotlib, Seaborn, data cleaning & wrangling, exploratory data analysis, Power BI, Tableau
Generative AI & LLMs	Prompt engineering, LLMs and AI APIs, RAG, vector databases, LangChain, LlamaIndex, AI agent frameworks (CrewAI, AutoGen), AI application deployment
AI / ML	OpenCV, TensorFlow, computer vision, machine learning fundamentals
Tools & Methods	Git, GitHub, VS Code, Jupyter Notebook, Agile collaboration, technical documentation

PROFESSIONAL EXPERIENCE

App Developer | ICRISAT – International Crops Research Institute for the Semi-Arid Tropics, Hyderabad

Mar 2024 – Dec 2024 | Jun 2025 – Oct 2025

- Developed and supported web and mobile applications for internal research and operational workflows, focusing on practical data collection and usability.
- Built Microsoft Power Apps solutions connected to SharePoint lists and configured Power Automate approval workflows for security and access processes.
- Worked on the Casual Entry Permit (CEP), Long-Term Gate Pass, and Computerized Maintenance Management System (CMMS) initiatives.
- Contributed to form design, wireframes, workflow diagrams, testing, debugging, user feedback iterations, and technical documentation.
- Collaborated with cross-functional stakeholders to clarify requirements and improve application workflows.

RESEARCH & INNOVATION

SafeLift: Next-Gen Borewell Rescue Bot | Robotics, Sensors, Embedded Systems

Co-Inventor (Invention Disclosure) • School of Technology, Woxsen University, Hyderabad

Co-authored an invention disclosure with faculty and student co-inventors for a portable robotic rescue system for children trapped in borewells and other confined spaces. The design combines a gentle-grip robotic arm, automated oxygen delivery with flow control, real-time vital-sign monitoring (heart rate, SpO_2, respiration, temperature), thermal imaging to locate the child, and an operator control interface with live camera feed and alerts.

PROJECTS

Cigarette Smoke Detection | Python, OpenCV, TensorFlow

Team Lead • Woxsen University, Hyderabad • Jan 2024 – Apr 2024

Led a three-member team on a computer-vision project focused on identifying cigarette smoke to support public-health and safety use cases.

Emotion Classifier | Python, TensorFlow/Keras, OpenCV, Streamlit

Built a CNN-based facial emotion recognition model trained on the FER-2013 dataset (48x48 grayscale images, 7 emotion classes), with a Streamlit app for real-time webcam prediction.

Campus Outing Request Portal | HTML, CSS

Developed a multi-page web portal for Woxsen University with a login page, outing request form and campus rules page, using a responsive, consistent UI.

Vehicle Rental Agency Database | Java, MongoDB

Designed and implemented a database-driven vehicle rental agency system using Java and MongoDB as a mini project.

Security Workflow Applications | Power Apps, SharePoint, Power Automate

Supported digital workflows for Casual Entry Permits and Long-Term Gate Passes, including structured data capture and multi-step approval routing.

TECHNICAL TRAINING & APPLIED SKILLS

Python with Data Analytics: Python, SQL, Pandas, NumPy, data cleaning/wrangling, exploratory data analysis, Matplotlib/Seaborn, Power BI, Tableau, Excel, and introductory machine-learning workflows.

AI Full Stack: Python foundations, prompt engineering, LLMs and AI APIs, GenAI application development, LangChain/LlamaIndex, RAG, vector databases, agent frameworks (CrewAI/AutoGen), workflow automation, and AI application deployment.

Additional experience: HTML/CSS/JavaScript, Java, API integration, Microsoft Power Platform, and database management.

EDUCATION & LEADERSHIP

Undergraduate studies in Data Science and Artificial Intelligence | Woxsen University, Hyderabad

Executive Member, AI & Robotics Club • Campus Ambassador, School of Technology
